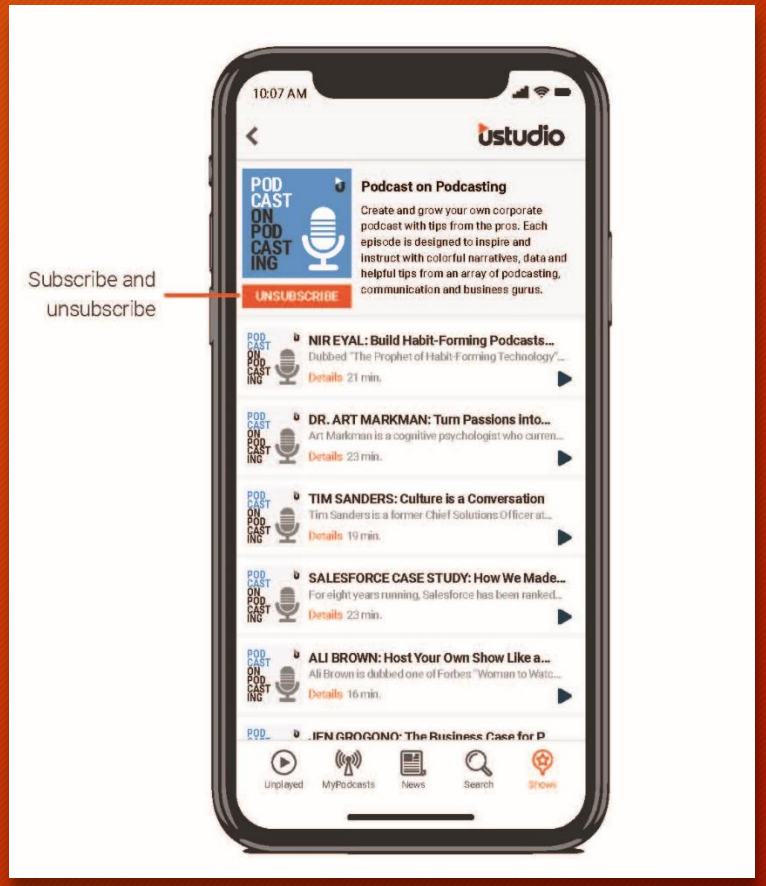
Subscribing and Unsubscribing

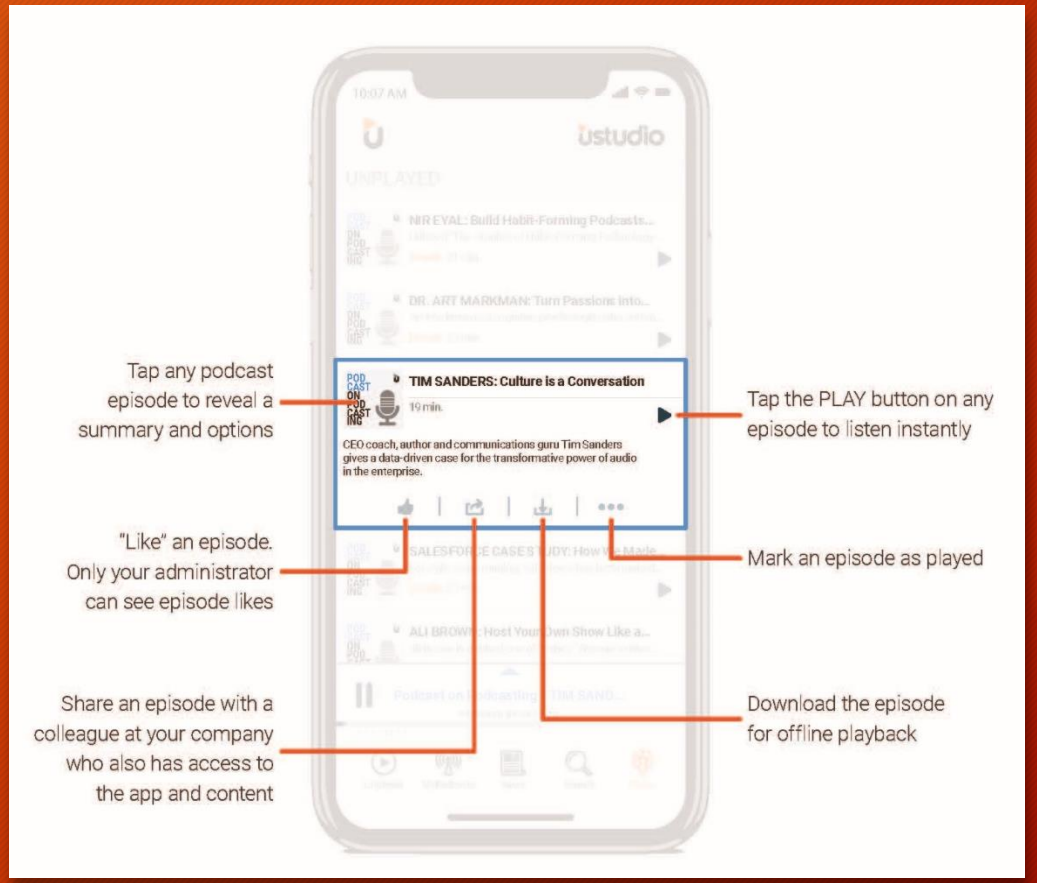
Just tap the orange button below any show icon to subscribe. If you're already subscribed to the show, the button will read unsubscribe, and tapping it will unsubscribe you from that show.



When you SUBSCRIBE or mark episodes as unplayed here, they will automatically be added to your unplayed queue.

Exploring and Playing Episodes

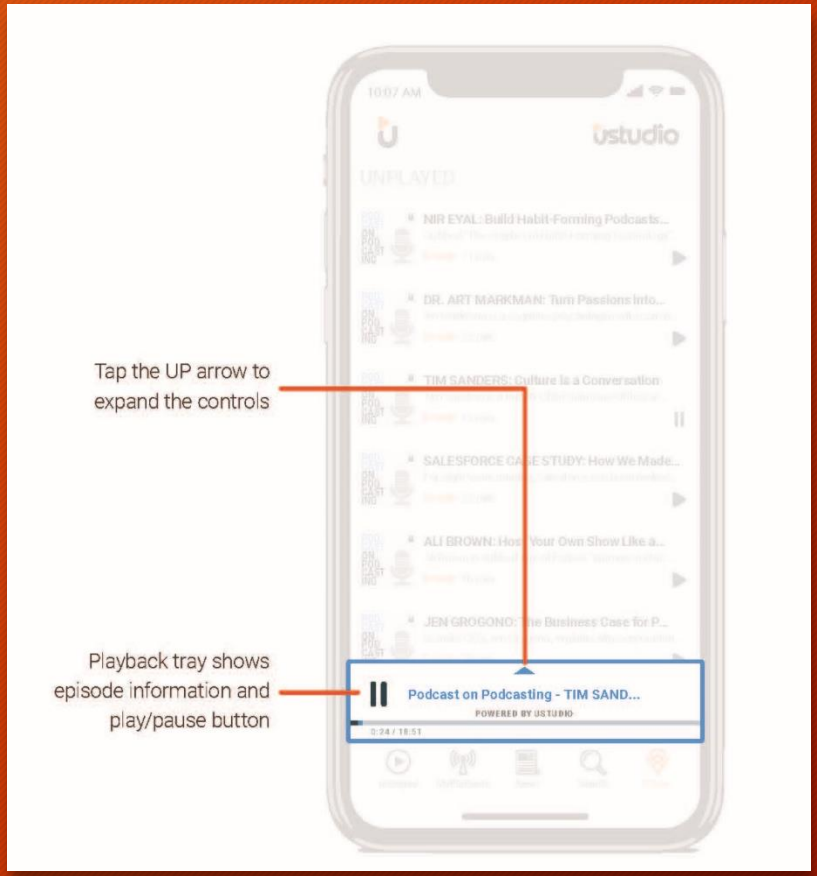
Unplayed episodes from shows you're subscribed to will appear in the order they will be played from top to bottom. Clicking "details" for a specific episode will redirect you to a screen where you will be able to view the episode description, like, share, download and mark episodes as played.



Pull down on the screen when exploring episodes to refresh and display the very latest in your queue.

Accessing Playback Controls

Expand the playback strip on the currently playing episode to reveal the expanded player and more playback controls.



Playback Controls and The Expanded Player

Easily rewind and move forward between and within episodes, increase the variable play speed and much more.
